Development of and Operational Experience with a High Powered D.C. Chopper for 1500 Volt D.C. Railway Equipment

C.E. Band and J.H. Stephens

Introduction. In order to progress beyond the 600/1000 Volt D.C. traction systems, for which chopper techniques were established, a 1500 volt equipment was built in 1967 and has been in regular service since July 1968. The equipment was based on operational experience obtained w1ith 600 volt chopper on London Transport Board's fourth rail system, and was supplied to N.R. for installation in one of their motor coaches.

Power Circuits. The power circuit is arranged to have a separate chopper network for each permanently coupled series pairs of motors, with the two networks linked to the 1,000 volt overhead supply via a common filter choke and capacitor (Fig. 1). The traction system experiences translent voltages of up to 6kV, which are reduced to a more acceptable level by means of a spark gap/metrosil network set to spark over at 3700 volt D.C. This enables the following power networks to be employed:-

- TI 2 parallel strings, each string 6 series 800 volt inverter grade thyristors
- T2 1 parallel string, each string 4 series 1100 volt limited turn off thyristors
- DI 2 parallel strings, each string 2 series 2200 volt diodes
- D2 1 parallel string, each string 3 series 2200 volt diodes
- D3 2 parallel strings, each string 4 series 2200 volt diodes

Each device is mounted on a separate heat sink and natural cooling is used throughout.

In order to reduce the size of the filter capacitor and to double the frequency of the line ripple current, the chopper networks are arranged to pulse alternately, each one covering the range 100 Hz to 400 Hz. During motoring cut-out conditions, the minimum frequency is raised to 130 Hz in order to keep the ripple frequency well above the safety signaling frequencies of 50 Hz and 75 Hz.

Band and Stephens are with A.E.I. Traction, Ltd.

BEST AVAILABLE IMAGES

Defective images within this document are accurate representations of the original documents submitted by the applicant.

Defects in the images include but are not limited to the items checked:
☐ BLACK BORDERS
☐ IMAGE CUT OFF AT TOP, BOTTOM OR SIDES
☐ FADED TEXT OR DRAWING
☐ BLURRED OR ILLEGIBLE TEXT OR DRAWING
☐ SKEWED/SLANTED IMAGES
☐ COLOR OR BLACK AND WHITE PHOTOGRAPHS
GRAY SCALE DOCUMENTS
☐ LINES OR MARKS ON ORIGINAL DOCUMENT
☐ REFERENCE(S) OR EXHIBIT(S) SUBMITTED ARE POOR QUALITY
·

IMAGES ARE BEST AVAILABLE COPY.

OTHER:

As rescanning these documents will not correct the image problems checked, please do not report these problems to the IFW Image Problem Mailbox.
